CHATHURYA BURRAVENI

PYTHON DEVELOPER | SOFTWARE DEVELOPER | SECURITY & AI AUTOMATION

(850) 816-0994 | bchathurya78@gmail.com

LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Software Developer specializing in Python automation, Java/Spring Boot backend engineering, and enterprise REST/GraphQL integrations. At T-Mobile, built API-driven workflows connecting Microsoft Graph, ServiceNow, Akamai, and threat intelligence; analyzed 849 Akamai properties and approximately 6,000–6,500 domains. Experienced in Claude-assisted development, MCP-based ServiceNow integrations, authentication, CI/CD, and production troubleshooting.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, TypeScript, SQL, Bash, C#

Backend Engineering & APIs: Spring Boot, Spring MVC, Spring Security, Hibernate, REST, GraphQL, Node.js, Flask (basic), microservices

Security & Enterprise Integrations: Akamai WAF, SiteShield, PAPI, EdgeGrid, Microsoft Graph, ServiceNow, Spur API, OAuth 2.0, JWT, RBAC

Python Automation & AI Agents: ThreadPoolExecutor, concurrency, retries/backoff, API validation, Claude, MCP tool/agent integrations, OpenAI GPT API

Cloud, DevOps & Databases: AWS (S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, GitHub Actions, PostgreSQL, MongoDB, MySQL, Oracle

Frontend, Testing & Monitoring: React, Angular, Material UI, WebSockets, Postman, PyTest, JUnit, Mockito, Cypress, Swagger, ELK Stack

PROFESSIONAL EXPERIENCE

Python Developer / Software Developer — WAF Security Automation | October 2025 – Present

Insight Global | Client: T-Mobile

- Developed Python-based WAF automation connecting request intake, IP validation, ServiceNow ticketing, security analysis, and reporting through enterprise APIs.
- Integrated Microsoft Graph shared-mailbox access with request parsing and ServiceNow Catalog APIs to create and update RITM/SCTASK records for IP allowlisting.
- Implemented multistage IP validation covering IPv4/IPv6 format, geo/ASN restrictions, static-IP/VPN indicators, and Spur threat intelligence, with requester notifications.
- Built Akamai SiteShield inventory analysis using PAPI and EdgeGrid, recursively inspecting rule trees across 849 properties and flagging 70+ for configuration review.
- Designed concurrent property scanning with Python ThreadPoolExecutor, 429 rate-limit handling, exponential backoff, error isolation, progress logs, and CSV exports.

Insight Global | Client: T-Mobile (continued)

- Developed external attack-surface analysis for approximately 6,000–6,500 domains, correlating DNS/CNAME, HTTP responses, hosting signals, and WAF presence into risk categories.
- Built filterable dashboards for domain-risk findings, IP-validation stages, and investigation queues to support WAF operational review.
- Tested ServiceNow Change Request API record creation and evaluated integration requirements for future change-management automation.
- Used Claude to assist Python coding, debugging, and refactoring; separately integrated MCP-based ServiceNow agent tools with validation-agent workflows.
- Investigated OAuth and API-permission issues, ServiceNow routing, credential handling, and dashboard-service failures with security and platform teams.

Full Stack Developer | August 2025 – October 2025

American IT Solutions, Inc.

- Developed and maintained internal backend services and automation using Python and Java.
- Implemented JWT authentication and role-based access control for REST endpoints.
- Automated API validation with Postman and Python scripts to reduce repetitive verification.
- Supported Jenkins/Docker delivery workflows, backend troubleshooting, and collaboration with engineering and QA teams.

Full Stack Developer | October 2024 – July 2025

Intelligenie LLC | Client: Dell Technologies

- Developed Spring Boot/Hibernate microservices and REST/GraphQL APIs with PostgreSQL, reducing backend latency by 23%.
- Contributed to Dell's GenAI-enabled enterprise knowledge search platform, integrating Spring Boot services with OpenAI GPT APIs and React dashboards.
- Refactored synchronous APIs into asynchronous services, reducing response time from 500 ms to 120 ms under load.
- Implemented Spring Security, OAuth 2.0, JWT, and RBAC for secure enterprise API access and internal security reviews.
- Built Python API-monitoring and validation utilities; supported application observability with AWS CloudWatch and ELK Stack.
- Worked on PostgreSQL and MongoDB query optimization and troubleshooting for data-intensive application workflows.
- Implemented Postman-based API testing and supported React/backend integration for contextual search experiences.
- Configured Jenkins and Docker CI/CD pipelines, improving deployment efficiency by 65%; worked with GitHub Actions delivery workflows.

Assistant System Engineer / Software Developer | July 2021 – January 2023

Tata Consultancy Services (TCS)

- Modernized financial application services using Spring MVC and REST APIs, improving application performance by 40%.
- Implemented OAuth 2.0 and JWT authentication for secure transaction and application workflows.
- Created Swagger API documentation and JUnit/Mockito unit tests, achieving 82% test coverage.
- Optimized Oracle SQL queries and indexes, reducing reporting runtime from five minutes to under one minute.
- Built scripts supporting log validation and internal compliance-oriented operational checks.

Front-End Developer | December 2019 – June 2021

BrownFrame Technologies

- Built responsive React and Angular dashboards with WebSocket-based real-time stock and event updates.
- Implemented Material UI and WCAG 2.1 accessibility practices to improve usability and cross-browser consistency.
- Created reusable component libraries, reducing sprint delivery time by 40%.
- Wrote Cypress UI tests and API-response checks to strengthen release quality.
- Collaborated with backend teams on REST integrations, application instrumentation, and front-end performance tuning.

EDUCATION

Master's Degree in Computer Science | University of Central Missouri | August 2024

Bachelor's Degree in Information Technology | Sreenidhi Institute of Science and Technology | June 2021

CERTIFICATIONS

- AWS Certified Cloud Practitioner — Amazon Web Services
- NPTEL: Joy of Computing Using Python — Elite Silver (87%)
- Python Basics — Coursera
- TCS Career Edge: Knockdown the Lockdown — Tata Consultancy Services

ACADEMIC PROJECTS

Speech Emotion Recognition System | Python, CNN, MFCC, RAVDESS

- Developed an audio emotion-classification system using MFCC features and a CNN trained on the RAVDESS dataset; achieved 86% accuracy.
- Implemented waveform and spectrogram visualizations to support model evaluation and tuning.

Real-Time Face Mask Detection | Python, TensorFlow, Keras, OpenCV, MobileNetV2

- Developed a real-time video-based face-mask classifier using a trained MobileNetV2 model and OpenCV processing.
- Integrated TensorFlow/Keras inference for live classification and achieved 95% accuracy.
